

**THINK OUTSIDE**

**Sometimes, success in business depends upon your ability to see the **BIG PICTURE**.**

With the support of a great data center, you can sit back, relax, and get outside common business concerns. Every day, your data center faces fresh operational demands. As needs for performance, scalability, and reliability grow, you need a data center that optimizes resources and reduces total cost of ownership.

**LET HELIO SOLUTIONS**, a Sun Microsystems iForce<sup>SM</sup> Partner, be your guide to agility in your data center. You'll reap the benefits of optimized resources and lowered cost of ownership. We'll call you soon to discuss how our **Best Practices** can help you.

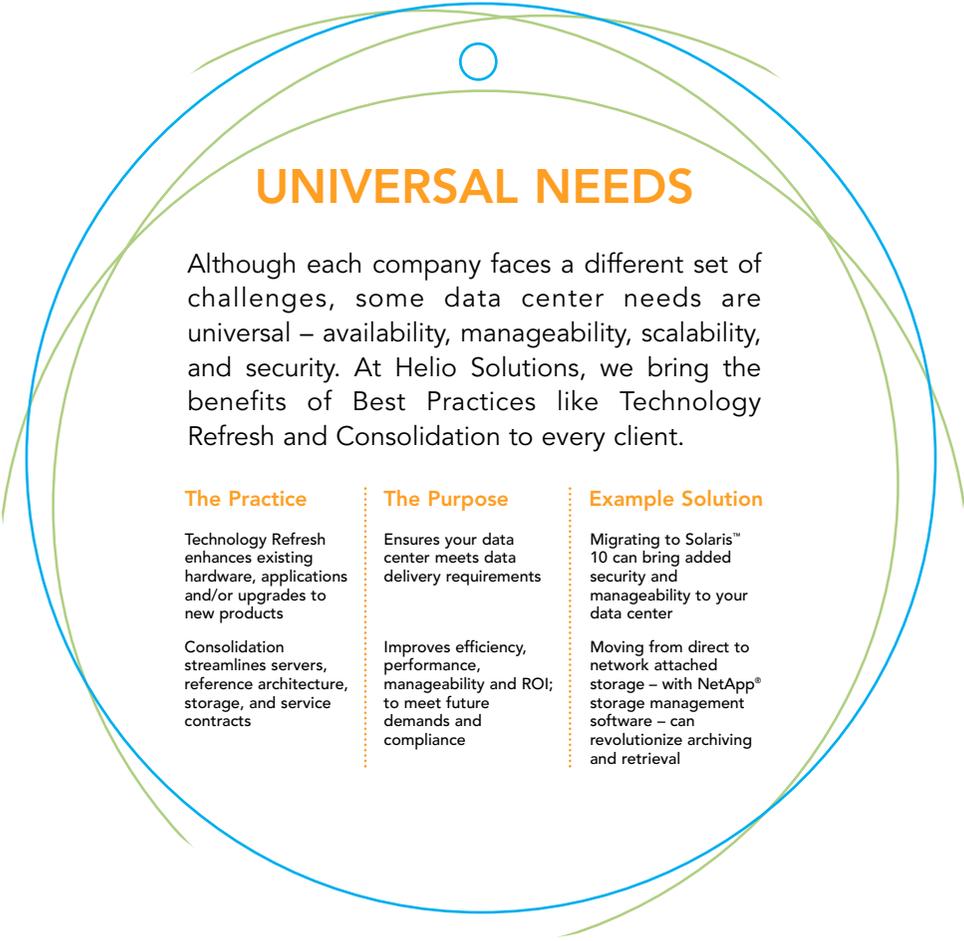

**Set an appointment with us, and we'll bring along a gift for you, a FREE National Parks Pass to help you get outside this summer.**

Your National Parks Pass, valued at \$50.00, grants you free admission into ANY designated U.S. National Park and is valid for one full year from first use in a park.

## SEE THE FOREST AND THE TREES

At Helio Solutions, we start with a thorough **analysis** of your current workload, baseline capacity, and future demands. Employing Next Generation Data Center Best Practices, we **architect** and **implement** solutions designed to serve your needs and help you serve your customers. Our Consolidation and Technology Refresh recommendations, combined with our expertise and commitment to service, will keep your business moving, improve user satisfaction, and maintain security – all at the same time.

## UNIVERSAL NEEDS

Although each company faces a different set of challenges, some data center needs are universal – availability, manageability, scalability, and security. At Helio Solutions, we bring the benefits of Best Practices like Technology Refresh and Consolidation to every client.

### The Practice

Technology Refresh enhances existing hardware, applications and/or upgrades to new products

Consolidation streamlines servers, reference architecture, storage, and service contracts

### The Purpose

Ensures your data center meets data delivery requirements

Improves efficiency, performance, manageability and ROI; to meet future demands and compliance

### Example Solution

Migrating to Solaris™ 10 can bring added security and manageability to your data center

Moving from direct to network attached storage – with NetApp® storage management software – can revolutionize archiving and retrieval

## THE SAFE HAVEN OF SOLARIS™ 10

If you want to keep your business out of the woods, we recommend the unparalleled security and relentless availability of the Solaris™ 10 Operating System. Solaris 10 offers these benefits and more:

- Reduced costs and complexity
- Minimized business interruption
- Extreme performance
- Binary compatibility
- Agility across multiple platforms
- Increased access control
